

Single

Our premiere sound dome, the Single Localizer offers the highest quality audio and optimal isolation. Featuring a *6:1 isolation ratio*,* the Single is the best solution for applications requiring localized audio.

SoloSphere

The Solosphere is the answer for applications with limited financial resources or space. Its sleek appearance features a 20" diameter dome with a 10" height. The Solosphere maintains quality audio and provides a *3:1 isolation ratio*.*

Double

The Double Localizer provides an isolated stereo audio experience for up to two listeners. Utilizing our standard 32" diameter dome, the double provides a *4:1 isolation ratio*.*

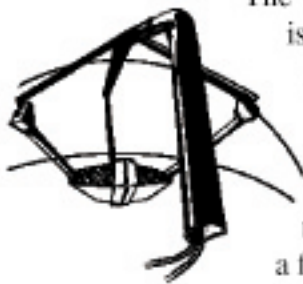

Quad

The Quad Localizer provides a stereo audio experience for a small group of listeners. Utilizing our 32" diameter dome unit, the Quad provides a *2:1 isolation ratio*.*

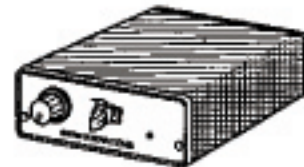

** Isolation ratio refers to the sound level heard under the dome compared to the level of sound heard just outside the domes edge. All Sound Domes are crafted in the USA and are manufactured with the highest quality cherry and curly maple woods.*

TriMount Pole Structure

The TriMount pole system is an optional mounting accessory for kiosks, listening stations and other applications where it is desirable to mount the Localizer to a free standing structure or wall. Quick and easy to assemble, the TriMount conceals speaker wires and presents a clean, sleek appearance. The system includes all the necessary mounting hardware.

Virtuoso Amplifier

The Virtuoso is an optional amplifier specifically engineered to optimize the sound performance of the Localizer family. Featuring special equalization circuitry, the Virtuoso provides the highest quality sound with minimal background noise and distortion. Its power output is suitable for the loudest conditions.

Vocalizer Microphone

The Vocalizer upgrade facilitates two way communication by adding a microphone to the speaker enclosure. The microphone collects sounds from the person speaking under the dome, while de-emphasizing ambient noise. The Vocalizer allows for a semi-private conversation making it perfect for video conferencing, phone systems or use with a computer. Used in conjunction with a wireless headset the Vocalizer is perfect for use at banks, pharmacies, and presentations.
